MOSAICS

www.msistone.com
Mix and Match
to create the design of your dreams.
Steal This Look
Create a rug pattern for extra special design details

Mosaics make great floors
Hexagons are trendy but familiar
Don’t forget your mirror wall

DESIGNER TIPS

1. Mochachino Hexagon Pattern
2. Henley 2” Hexagon
3. Whisper White Arch Herringbone Britt
TREND ALERT: WHITE HOT STYLE

DESIGNER TIP:
White Marble is all the rage! Whether you desire a work of art from Mother Nature herself or prefer a white hot knockout in glass. White marble looks offer a palette that is style neutral but off the beaten path.

Incorporate mosaic tiles into your floor design for a classic but timeless look.

Grout: Non sanded #10 Antique White
Product categories and classifications such as Granite, Marble, Travertine, Limestone, Quartzite, Sandstone, etc. are based on general accepted industry classification. They do not necessarily reflect the geological compositions of the material or customs classification. In many cases, these materials are technically made of a different geological make up. For example, many stones are commonly known as granites, but geologically, they are actually Charnockites, Polimitic Metaconglomerates, Gneiss and other various different geological stones. In addition, many stones commonly referred to as marbles are geologically limestones. MSI makes no guarantee or representation of the geological composition of any stone. In addition, the categories reflected on our website or brochure, should not necessarily be used for customs classification.

Buyer/Owner must determine slip resistance suitability and maintainability. Natural stones, ceramic, porcelain, quartz and related products represent products of nature; we cannot be held responsible in any cause of action resulting from their use in any form. M S International, Inc. makes no expressed or implied warranty, for any particular use. These products inherently lack uniformity and are subject to variation in aesthetics, color, shade, finish, tint, hardness, strength resistance, density, etc. Natural stone may be characterized by dry seams, pits, and fossils. In polished and honed stones, these pits are often filled during the manufacturing process or at the time of installation. These fills can occasionally pop out from normal wear and use. In these instances, it may be necessary to refill these voids as part of a normal maintenance procedure. Any samples submitted are with the understanding that these qualities are inherent in the nature of the product and are not to be considered latent defects.

The information in this brochure is intended for U.S. and Canadian businesses or their customers only and is provided “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY RIGHTS. In no event shall MSI be liable for any special, indirect or consequential damages relating to this or use of these materials.
