Putting an exciting twist on the super popular wood look trend, we're now offering two wood look mosaics - Driftwood Hexagon and Driftwood Interlocking. These decorative mosaic tiles offer the aesthetic qualities of real wood but they're made from recycled glass. Neutral hues and nature inspired, they harmonize with nearly any décor - creating visual interest without overpowering. These gorgeous wood look mosaics are sure to become the most popular items in our Decorative Mosaics & Wall Tile collection. Alongside the wood look items we are extending the recycled glass offering to include a travertine look as well. Sandhills comes in a trendy hexagon format and the ever popular interlocking design.
