

About The Product

Acoustic Wood Slat Panels offer a serene and cozy ambiance in various shades, ranging from warm beige to rich browns, mimicking textured wood without the need for staining or sanding. Featuring a sophisticated 3D fluted design, they combine elegance with functionality, crafted from natural wood veneer strips on a PET Fiber acoustic pad to effectively absorb sound. Ideal for spaces like living areas, meeting rooms, and offices, these panels seamlessly integrate as both decorative elements and effective sound solutions. Easy to install with screw-to-stud mounting, each box includes 32 black screws, catering to homeowners and businesses seeking a stylish yet acoustic-friendly environment.
