Make your walls pop with the creative textures of the Dymo line. An all white 12"X24" ceramic wall tile line with 3 spectacular 3D effects, accompanying a classic white glossy tile, mix and match this dynamic line to create unique movement in your space. Your eyes will dance across the patterns, continually stunning from every angle.

Technical Information

Primary Colors: White
Material Type: Ceramic
Finish: Glossy
Polished: Hardness / Mohs 5
Matte: Hardness / Mohs 7

Installation

1/8" Grout Size is recommended on all tile installation. When installing rectangular tiles a less than 33% staggered brick lay is strongly recommended.

Disclaimer:Wet Cutting Instruction: We recommend wet cutting or the score & snap method during the installation process. Do not dry cut product using power tools during the installation process. Improper installation techniques could expose installer to harmful silica dust. Recomendamos el corte en húmedo o el método de marcar y encajar durante el proceso de instalación. No corte en seco el producto utilizando herramientas eléctricas durante el proceso de instalación. Las técnicas de instalación inadecuadas podrían exponer al instalador a polvo de sílice nocivo.

MSI and its MFG highly recommends that the Homeowner and Tile installer lay out the tiles and visual inspect the pattern prior to installation for optimal aesthetics. Once installed no claims will be accepted for pattern uniformity.

Variation in shade is an inherent attribute of porcelain tile.
To ensure customer satisfaction: Make sure to look over all tiles before installing. Please select tile from same lot: same size, and numerical shade. Intersperse tiles throughout your job from different boxes. Rotate the tiles so there won't be repetitive patterns.

*No claims accepted after tile installation.

Features At A Glance

- Entry level 12X24 and 12x36 wall tile with 3D accents
- 3 patterns with 1 plain white glossy
- Trendy designer looks at a portion of the cost

Large format tiles: It is mandatory that the mortar coverage on the floor surface and tile be greater than 95% coverage to be fully supported. Voids due to insufficient coverage will result in cracking and tile displacement.
