General Cleaning and Maintenance Instructions

Wipe fixture down with a soft cloth after each use to prevent mineral build-up and water-spotting. Should spotting occur, remove water spots with warm water and a soft, damp cloth.

Do not use abrasive cleaning products or aggressive chemicals. Abrasive cleaning pads, or harsh/abrasive polishes on the fixture could scratch the finish. Use of such products may void the warranty.

Do not allow any personal hygiene products to leak on the fixture. If this happens please wipe off with a damp cloth. Any potential build up from these types of items could possibly wear away any protective coating and may also diminish the beauty and durability of the finish.
