Sonoma Driftwood ceramic tiles are designed to resemble a rich naturally patinaed driftwood. These ceramic wood tiles feature warm gray tones in high demand 6"x24" planks with rectified edges ideal for interior design projects including floors, countertops, backsplashes, and accent walls.

### Technical Information

Primary Colors: Brown, Gray  
 Material Type: Ceramic  
 Finish: Matte

### Features At A Glance

- Rectified edge
- Rectified tiles allowing smaller grout joints
- Available size 6x24

### Installation

1/8" Grout Size is recommended on all tile installation. When installing rectangular tiles a less than 33% staggered brick lay is strongly recommended.

Large format tiles: It is mandatory that the mortar coverage on the floor surface and tile be greater than 95% coverage to be fully supported. Voids due to insufficient coverage will result in cracking and tile displacement.

### Disclaimer:

Variation in shade is an inherent attribute of porcelain tile.

To ensure customer satisfaction: Make sure to look over all tiles before installing. Please select tile from same lot: same size, and numerical shade. Intersperse tiles throughout your job from different boxes. Rotate the tiles so there won't be repetitive patterns.

\*No claims accepted after tile installation.
